

Your Honor: I am proud to be able to offer my comments into this Public Docket. It is obvious that the FAA is still trying to conceal the true basis for this petition from the "Federal Register" readers.

Several facts are known:

- 1)The FAA has knowingly made false and deceitful claims regarding safety in 1959 when it promulgated the "age 60 rule".
- 2)The FAA has obstructed ALL scientific evidence and studies that might have produced reliable evidence to overturn the "age 60 rule".
- 3) The FAA knowingly ignored the recommendations of the 1980 National Institute of Aging panel that stated that the data on older pilots should be collected for the purpose of changing the "age 60 rule".
- 4)The FAA has a long history of abuse of the public trust with regard to this issue. This abuse continues today; forcing the nation's most experienced pilots to early retirement.

Sincerely,
Dennis Thompson
